

Vaibhav Sathe

Full Stack Developer (Java + MERN) | Spring Boot | Node.js | React | REST APIs

☎ +91 797-282-4554 ✉ vaibhav.sathe.159@email.com 🔗 [linkedin.com/in/vaibhav-sathe89](https://www.linkedin.com/in/vaibhav-sathe89) 🐙 github.com/vaibhavCodes18

Career Objective

Full Stack Developer (Java + MERN) with experience building scalable web applications using Spring Boot, Node.js, React.js, Redis, MySQL, PostgreSQL, and MongoDB. Skilled in developing RESTful APIs, implementing secure authentication and email verification workflows, and containerizing applications using Docker. Experienced in designing clean layered architectures, optimizing backend performance, and building secure, production-ready applications.

Education

Ballarpur Institute of Technology
Bachelor of Technology in Computer Science

OCT 2022 – Jun 2026
Ballarpur, Maharashtra

Experience

Full Stack Java Trainee & Intern | *Kapil IT Skill Hub* | July 2025 – Mar 2026

- Built full-stack applications using Spring Boot, React, and MySQL, implementing RESTful APIs for role-based systems.
- Designed scalable backend using JPA and Hibernate with proper entity relationships and layered architecture.
- Implemented secure authentication and CRUD operations, ensuring reliable data handling and system performance.
- Containerized application using docker and docker-compose.

Technical Skills

Languages : Java, JavaScript, SQL
Frontend : React.js, Redux Toolkit, HTML5, CSS3, Tailwind CSS
Backend : Spring Boot, Node.js, Express.js, REST APIs, Spring Security, Authentication, OAuth
Databases : MySQL, PostgreSQL, MongoDB, Redis
Tools : Git, GitHub, Linux, Docker, Maven, Cloudinary
ORM / ODM: Hibernate, Prisma, Mongoose
AI : LLM API Integration.

Projects

Project Approval Management System | github.com/vaibhavCodes18/Project-Approval-System

- Engineered a role-based backend system using Spring Boot and MongoDB to streamline multi-stage project approval workflows.
- Developed RESTful APIs and implemented secure authentication using Spring Security, JWT, and SMTP-based email verification.
- Containerized the application using Docker to enable consistent deployment and scalable backend execution across environments.

Employee Management System | github.com/vaibhavCodes18/4bitLabs-Employee-Management-System-Backend

- Built a role-based system with 4 dashboards to manage users, batches, and workflows.
- Developed 35+ REST APIs using Spring Boot, JPA, and Hibernate for scalable backend operations.
- Implemented JWT-based authentication and handled data integrity using custom cascade logic.

AI Developer Tool | github.com/vaibhavCodes18/AI-Developer

- Built a full-stack AI tool using the MERN stack, enabling real-time response generation through Gemini API integration.
- Implemented streaming-style UI in React to deliver dynamic and responsive user interaction.
- Designed scalable backend using Node.js and MongoDB for efficient request handling and API integration.

Achievements

- Winner, Blind C Coding, BIT Ballarpur.
- Finalist, HackYourPath 6.0 at HITAM Hyderabad.
- Finalist, CIH 2.0 At Suryodaya College of Engineering & Technology - Nagpur.

Certifications

Certified Full Stack Developer, Kapil Skill Hub : (Link)
GeeksforGeeks GfG 160 - 160 days Completion Certificate: (Link)
